
Ridge probe from the mean-pooled prefix residual to task progress (frame index / episode length), 960 frames of 80 LIBERO training episodes, 5 folds split by episode; bands are 95% bootstrap intervals over episodes. Decodable does not mean used: F6 to F8 test whether the action expert reads this direction. Pilot: pi05_base vs pi05_libero, which was fine-tuned on the full LIBERO data. This is a large fine-tune; the few-demo regime is left for later.
